PERSONAL PROJECTS

SociaSpark - A Social Media App (ReactJs)

(04/2022 - 07/2022)

- The front end is built using **Reactjs**, **SemanticUI**, **ApolloClient**, and other libraries. The back end is built using **NodeJs**, **ExpressJs**, **GraphQL**, and **MongoDB**. This app was my personal project for practicing GraphQL spec on both frontend and backend.

ACHIEVEMENTS

CodeFest'21 Winner (12/2021 - 12/2021)

CodeFest'21 is the largest hackathon organized in NUST in which I participated with my other 3 members. We presented our solution by proposing an entirely new idea of a "smart web assistant" which aids a user while browsing different websites.

Deep Learning Nanodegree Scholarship by Udacity (05/2021 - 07/2021)

I learned about Machine Learning Domain from basic convolution neural networks to advanced **generative adversarial networks** in this program by working on real-world projects.

Microsoft Learn Student Ambassador of NUST (08/2020 - Present)

I gained the experience of working with a team, connected with the other students and Microsoft employees, and equipped me with leadership skills.
